U.S. Patent and Trademark Office PTO-326 (Rev. 04-01)

Art Unit: 3714

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Coin Counter and Ticket Dispenser For a Game Machine

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

The abstract submitted by the Applicant does not adequately describe the invention.

Art Unit: 3714

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: How the number of coins determines that the ticket is generated. Claim 11 depends from claim 1, but only makes sense if it is taken to depend from claim 10. Examiner believes the claim to contain a typographical error and will treat it as if it depends from claim 10.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3, 4, 6 & 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Castellano et al. (US Patent Number 5,477,952).
 - Claims 1: Castellano teaches a game machine (Col 13, 23). There is a counter for counting the number of coins a player has placed in the machine. (Col 6, 32-36) There is a means (the game machine's display) for showing the player when the ticket will be printed (i.e. when the player wins the game). There is a ticket dispenser (31)

Claim 3: The dispensing unit is placed inside the game machine. (Col 12, 22-28)

Page 3

Art Unit: 3714

Claim 4: The dispensing unit is an add-on to any existing gaming machine and gaming device. (Col 16, 17-20)

Claim 6: The dispensing unit is a self-contained unit that does not affect the play or outcome of the game.

Claim 8: Fig 1 clearly shows four coin slots (21-24) that correspond to different denominations (i.e., nickel, dime, quarter, and dollar).

3. Claims 12-14, 17 & 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Quinn (US Patent Number 3,688,276).

Claim 12: Quinn teaches a game machine (16). The player puts in coins. (Col 4, 38-40) The machine counts the coins and the number of counted coins is shown to the player. (Col 4, 47-50) The number of coins needed for a ticket to be generated in shown to the player. (Col 4, 40-41) A ticket is dispensed when the number of counted coins equals the number of coins needed. (Col 2, 6-12)

Claim 13: The counting the coins is accomplished by counting coin pulses off of the machine's hard meter and the ticket is dispensed base on the number of coins deposited. (Col 2, 6-12)

Claim 14: The ticket is a lottery ticket. (Abstract)

Claim 17: The number of counted coins is set to zero once a ticket is dispensed. (Col 4, 47-50)

Claim 18: Quinn teaches using a remote unit to set the price of the ticket. (Col 1, 64 – Col 2, 16)

Art Unit: 3714

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 2 rejected under 35 U.S.C. 103(a) as being unpatentable over Castellano as applied to claim 1 above, and further in view of Bittner et al. (US Patent Number 5,290,033).
 - Claim 2: Castellano teaches the invention substantially as claimed. Castellano does not, however, teach mounting the device on the side of the game machine. Bittner teaches mounting an analogous device (202) on the side of the gaming machine. Castellano teaches that the device can be used a as retrofit to existing game machines. In cases where the device did not fit within the game cabinet, it would have been obvious to one of ordinary skill in the art at the time of the invention to have attached the dispensing unit to the gaming machine as a side mounted box in order to retrofit a gaming machine that did not have room inside the gaming machine cabinet.
- 6. Claims 5 & 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castellano et al. (US Patent Number 5,477,952) as applied to claim 1 above, and further in view of Heidel et al. (US patent Number 5,342,047).
 - Claim 5: Castellano teaches the invention substantially as claimed. Castellano teaches that the device may be attached to virtually any gaming machine. (Col 16, 17-20)

 Castellano's invention is intended to detect and prevent fraud. (Abstract) Fraud is a significant problem in the gaming industry. Heidel teaches a game machine that can be

Page 5

Application/Control Number: 09/933,067 Page 6

Art Unit: 3714

used a number of different games. Heidel illustrates video poker (Fig 1) and video keno (Fig 2b). Video bingo is a well-known equivalent. Video poker, keno, and bingo are all extremely well known in the art. They are extremely popular with many players and, along with reel-type machines, form the backbone of the electronic gaming industry. It would have been obvious to one of ordinary skill in the art to have applied Castellano's coin tracker to video poker, keno, and bingo machines in order to detect and prevent fraud.

Claim 9: Castellano teaches the invention substantially as claimed. Castellano teaches printing a ticket as a reward, but does not teach that the ticket is a lottery ticket. Heidel teaches dispensing a lottery ticket. (Col 1, 10-18)

7. Claims 7, 10, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castellano as applied to claim 1 above, and further in view of Piechowiak et al. (US Patent Number 6,012,982).

Claim 7: Castellano teaches the invention substantially as disclosed. Fig 3 shows the counter (12) counting pulses of the game machines hard meter (52). Castellano does not, however, teach awarding the player a bonus based on the number of coins played. Piechowiak teaches a game that awards a bonus based on a player reaching a certain coin-in threshold. (Abstract) Bonuses are well known to the art and are commonly used to increase player interest. It would have been obvious to one of ordinary skill in the art at the time of the invention to have awarded the player a bonus based on the number of coins played in order to increase interest in the game.

Art Unit: 3714

Claim 10: Piechowiak teaches linking games so that a combination of devices must have a certain number of coins inserted before a bonus (ticket) is dispensed. (Abstract)

Claim 11: Piechowiak teaches that there is a remote unit (122) for changing the number of coins necessary to generate the ticket.

8. Claims 15 & 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Quinn as applied to claim 12 or 14 in view of the Big Game Lottery.

Claims 15 & 16: Quinn teaches the invention substantially as claimed. Quinn teaches dispensing lottery tickets, but does not go into the mechanics of how lotteries operate. Lotteries operate using well-known principles. The Big Game is merely one of a myriad of examples of lotteries. The winner of lotteries is determined by holding a drawing — i.e., by lot. The size of the lottery jackpot is based on the number of tickets sold. In other words, the bonus prize is based on a percentage of total coins placed into all participating gaming machines. It would have been obvious to one of ordinary skill in the art at the time of the invention to have chosen the winner of the lottery by a random drawing and to have based the jackpot on a percentage of total coins placed into the gaming machines in order to follow standard practice for running a lottery.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These are other counters/ticket dispensers or bonus games.
